Practical No. 4

- Develop android application using View Text and Edit Text.

Q.1 Write code to display user input from EditText into TextView.

MainActivity.java :

```
package com.techtitans.madpracticals;

import android.os.Bundle;
import android.text.Editable;
import android.text.TextWatcher;
import android.widget.EditText;
import android.widget.TextView;
import androidx.appcompat.app.AppCompatActivity;
public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        EditText edt = findViewById(R.id.edtInput);
        TextView txt = findViewById(R.id.txtOutput);

        edt.addTextChangedListener(new TextWatcher() {
            @Override
            public void beforeTextChanged(CharSequence s, int start, int count, int after) { }

            @Override
            public void onTextChanged(CharSequence s, int start, int before, int count) {
                txt.setText(s.toString());
            }

            @Override
            public void afterTextChanged(Editable s) { }
        });
    }
}
```

activity_main.xml :

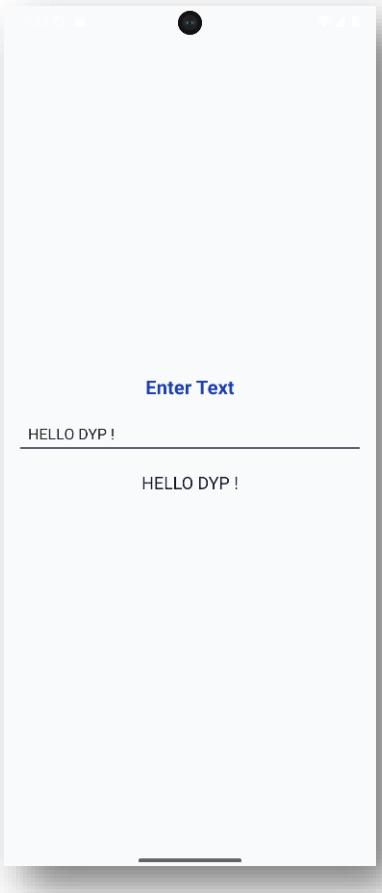
```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
```

```
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:id="@+id/main"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    android:gravity="center"
    android:padding="24dp"
    >

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Enter Text"
        android:textStyle="bold"
        android:layout_marginBottom="12dp"/>

    <EditText
        android:id="@+id/edtInput"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:hint="Type here"
        android:textSize="16sp"/>

    <TextView
        android:id="@+id/txtOutput"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Output will appear here"
        android:layout_marginTop="16dp"/>
</LinearLayout>
```



Q.2 Modify the app to show "Hello, [user name]!"
Q.3 Change font size and color of TextView using XML
MainActivity.java :

```
package com.techtitans.madpracticals;

import android.os.Bundle;
import android.text.Editable;
import android.text.TextWatcher;
import android.widget.EditText;
import android.widget.TextView;
import androidx.appcompat.app.AppCompatActivity;
```

```
public class MainActivity extends AppCompatActivity {
   @Override
   protected void onCreate(Bundle savedInstanceState) {
      super.onCreate(savedInstanceState);
      setContentView(R.layout.activity_main);

      EditText edtName = findViewById(R.id.edtName);
      TextView txtGreeting = findViewById(R.id.txtGreeting);

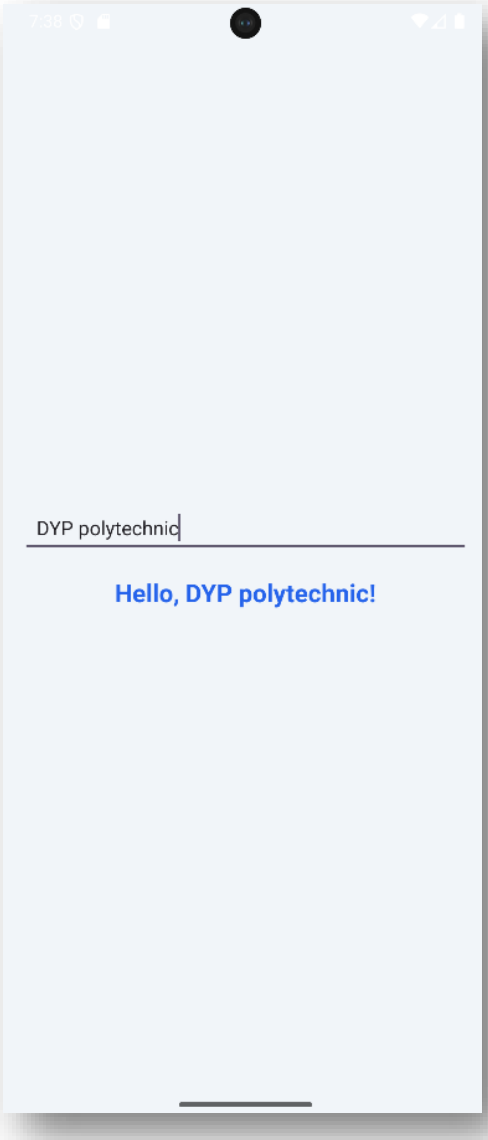
      edtName.addTextChangedListener(new TextWatcher() {
         @Override public void beforeTextChanged(CharSequence s, int start, int count, int
after) {}
         @Override public void onTextChanged(CharSequence s, int start, int before, int count)
{
            txtGreeting.setText("Hello, " + s.toString() + "!");
         }
         @Override public void afterTextChanged(Editable s) {}
      });
   }
}
```

activity_main.xml :

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
   xmlns:android="http://schemas.android.com/apk/res/android"
   android:layout_width="match_parent"
   android:layout_height="match_parent"
   android:orientation="vertical"
   android:gravity="center"
   android:padding="24dp"
   >

   <EditText
      android:id="@+id/edtName"
      android:layout_width="match_parent"
      android:layout_height="wrap_content"
      android:hint="Enter your name"
      android:padding="12dp"
      android:textSize="16sp"/>

   <TextView
      android:id="@+id/txtGreeting"
```

```
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="Hello!"
    android:textSize="20sp"
    android:textStyle="bold"
    android:textColor="#2563EB"
    android:layout_marginTop="16dp"/>
</LinearLayout>
```


Output :-
