Practical No.11

Q.1] Design five additional test cases for round-trip booking validation.

Test Case ID	Objective	Steps (Input)	Expected Output	Actual Output	Status
TC_01	Verify valid round-trip booking	From: Kolhapur to Pune Take off Date: 16 Jan 2026 Return Date: 17 Jan 2026	Round-trip booking successful	Booking successful	Pass
TC_02	Verify return date earlier than takeoff date	From: Pune to Kolhapur Take off Date: 17 Jan 2026 Return Date: 16 Jan 2026	Error: Return date must be after takeoff date	Error displayed	Pass
TC_03	Verify invalid destination selection	From: Kolhapur to Kolhapur	Error: Invalid destination	Error displayed	Pass
TC_04	Verify takeoff date and return date are same	Take off Date: 17 Jan 2026 Return Date: 17 Jan 2026	Error: Booking not allowed	Error displayed	Pass
TC_05	Verify payment failure when OTP is incorrect during round-trip booking	Enter valid card number & CVVEnter invalid OTP	Error: Invalid OTP, payment failed	Error displayed	Pass

Q.2 Apply BVA to check limits for passengers (1-6).

BVA to check limits for passengers

Input Parameters	BVA Value
Below minimum value	0
Minimum value	1
Just above minimum value	2
Maximum value	6
Above maximum value	7

Test cases :-

Test Case ID	Objective	Steps (Input)	Expected Output	Actual Output	Status
TC_01	Verify system behavior below minimum passenger limit	Enter Passengers: 0	Error: Invalid passenger number	Error displayed	Pass
TC_02	Verify system allows minimum passenger limit	Enter Passengers: 1	Booking should be allowed	Booking is allowed	Pass
TC_03	Verify system allows just above minimum passenger limit	Enter Passengers: 2	Booking should be allowed	Booking is allowed	Pass
TC_04	Verify system allows maximum passenger limit	Enter Passengers: 6	Booking should be allowed	Booking is allowed	Pass
TC_05	Verify system restricts above maximum passenger limit	Enter Passengers: 7	Error: Passenger limit exceeded	Error displayed	Pass
