Practical No. 07

Q.1] Design five additional test cases for login fields using ECP and BVA.

ECP (Equivalent Class Partitioning)

Input	Valid	Invalid
Email id	adityax.mane@gmail.com	Aditya.mane.com@gmil
Mobile Number	9370071238	93700712
Password (Must be 8 digits with Number and char)	Aditya19	Aditya1977@AP

Test Cases:-

Test Case Id	Test Scenario	Test Steps Input	Expected Result	Actual Result	Status
TC1	Verify Login with valid Email Address	Email : Aditya.mane.com@gmil	Mail Cannot Accepted and Login Unsuccessful	Login Unsuccessful Error :- "Email is Not valid"	Pass
TC2	Verify Mobile Number With (Min 10 and Max 10)	Mobile No. 9370071238 → Enter	1.Mobile number is verified using OTP 2.If OTP is correct Mobile No. is valid	Mobile No. is verified and Login Successfully	Pass
TC3	Validate Password Length (Min and max 8) ("@","numbers", "char")	Password = Aditya1977@AP → Submit	Error message displayed: *"Password must be exactly 8 characters"*	Error message displayed	Pass

BVA(Boundary Value Analysis)

Input	Minimum	Maximum
Mobile Number	10	10
Password	8	16

Test Cases:-

Test Case Id	Test Scenario	Test Steps Input	Expected Result	Actual Result	Status
TC1	Validate mobile number with correct parameters	Mobile No. = 9370071238 → Receive OTP → Enter correct OTP	Mobile number verified successfully and user logged in	Mobile number verified and login successful	Pass
TC2	Validate password with required parameters (letters, numbers, special character)	Password = Aditya@1977 → Submit	Password accepted as strong and login successful	Password accepted and login successful	Pass

Q.3] Apply Negative testing for empty whitespace, and invalid credentials.

Test Case Id	Test Scenario	Test Steps (Input)	Expected Result
TC_NEG_U01	Validate password missing numeric value	Password = Aditya@Pass	Password rejected with message: *"Password must contain at least one number"*
TC_NEG_U05	Validate password with only whitespace characters	Password = " "	Error message displayed for invalid password
TC_NEG_U08	Validate password with correct format but weak pattern	Password = AAAA@111	Password rejected as weak
TC_NEG_U04	Validate password with internal whitespace	Password = Aditya @19	Password rejected due to space in password
TC_NEG_U08	Validate password with correct format but weak pattern	Password = AAAA@111	Password rejected as weak

Q.2] Test the System's response for multiple failed login attempts (e.g., Lockout features)

Test Case Id	Test Scenario	Test Steps Input	Expected Result	Actual Result	Status
TC_001	Validate Email and password with correct credentials (pass – aditya01)	Email : adityamane5424@gmail.com password: (Aditya) Repeat 3 Times : Aditya Aditya Aditya	Multiple Failed attempts, Please try again later	Login Unsuccessful, Your account is locked for 10 min.	Pass
