Practical No. 03

Q. Design Test Cases for calculator application to verify its functionality (Black box Testing)

Test Case ID	Objective	Test Steps / Input	Expected Result	Actual Result	Status
TC_CAL_01	Verify addition of two floating-point numbers	Add(84.50, 88.16)	Result displayed as **172.66**	Result displayed as **172.66**	Pass
TC_CAL_02	Verify subtraction of two negative numbers	Sub(-10, -5)	Result displayed as **-5**	Result displayed as **-5**	Pass
TC_CAL_03	Verify multiplication of a negative and a floating-point number	Mul(-20, 4.5)	Result displayed as **-90**	Result displayed as **-90**	Pass
TC_CAL_04	Verify square of a negative number	Square(-9)	Result displayed as **81**	Result displayed as **81**	Pass
TC_CAL_05	Verify division of a negative number by a negative number	Div(-36, -6)	Result displayed as **6**	Result displayed as **6**	Pass
TC_CAL_06	Verify division by zero handling	Div(10, 0)	Appropriate error message displayed	Application crashes instead of showing error	**Fail**
