# Practical No. 16

## Q.1] Write five negative test cases for login with invalid credentials.

| Test Case ID | Objective | Steps / Input | Expected Result |
|---|---|---|---|
| TC_NEG_LOG_U01 | Verify login with correct username and password shorter than minimum length | Enter valid username; Password = less than minimum required characters | System should reject login and display password length validation |
| TC_NEG_LOG_U02 | Verify login with disabled / deactivated user account | Enter valid credentials of a deactivated account | Login should fail and account status message should be shown |
| TC_NEG_LOG_U03 | Verify login with expired password | Enter valid username and expired password | System should deny login and prompt user to reset password |
| TC_NEG_LOG_U04 | Verify login with special characters in password beyond allowed set | Enter valid username; Password = unsupported special characters | System should not allow login and show validation error |
| TC_NEG_LOG_U05 | Verify login when Caps Lock is ON (password mismatch) | Enter valid username; Enter password with Caps Lock ON | Login should fail due to password mismatch |
