Practical No. 05

Q.1] Design five new test cases combining OTP and image upload in one workflow.

Test Case ID	Objective	Input (Steps)	Expected Output	Actual Output	Status
TC_COM_01	Verify OTP with exactly 6 digits and proceed to image upload	Enter OTP = 789456 → Upload image img.png	OTP verified successfully and image uploaded	OTP verified and image uploaded successfully	Pass
TC_COM_02	Verify behavior with expired OTP	Enter expired OTP	Error message: *OTP expired* and access to image upload blocked	OTP verified successfully and image upload allowed	**Fail**
TC_COM_03	Verify image upload with maximum allowed size (5 MB)	Enter valid OTP → Upload image image_5mb.jpeg	OTP verified and image upload rejected if size limit exceeded	OTP verified and image upload rejected	Pass
TC_COM_04	Verify OTP resend functionality	Enter old OTP = 567890 (fails) → Enter new OTP = 568974	New OTP verified and image uploaded successfully	New OTP verified and image uploaded	Pass

		→ Upload image			
TC_COM_05	Verify image upload with minimum file size	Enter valid OTP → Upload image image_small.png (50 KB)	OTP verified and image uploaded successfully	OTP verified and image uploaded	Pass

Q.2] Apply Equivalence Partitioning for invalid OTP verification

Sr. No	Input Parameters	Equivalence Partitioning
1.	OTP Length	More than 6
2.	OTP Length	Less than 6
3.	Content	Non - numeric
4.	validity	Expired OTP
5.	Empty	Null

Test Cases for using the Equivalence partitioning for invalid OTP

Test Case ID	Objective	Input (Steps)	Expected Output	Actual Output	Status
TC_EP_01	Verify OTP with length more than 6 digits	Enter OTP = 2345676 (7 digits)	Error message displayed: *OTP is invalid*	Error message displayed	Pass
TC_EP_02	Verify OTP with length less than 6 digits	Enter OTP = 23456 (5 digits)	Error message displayed: *OTP length must be 6 digits*	Error message displayed	Pass
TC_EP_03	Verify OTP with non-numeric characters	Enter OTP = 56AV@	Error message displayed: *OTP must contain only numbers*	Error message displayed	Pass
TC_EP_04	Verify expired OTP	Enter expired OTP = 345678	Error message displayed: *OTP has expired*	OTP verified successfully	**Fail**
TC_EP_05	Verify empty OTP field	Leave OTP field blank → Submit	Warning message displayed: *"Please enter OTP"*	OTP verification failed without message	**Fail**
